Fostering Equity During a Time of Crisis

United Hospital Fund (UHF) Conference
July 15, 2020

Donna Frescatore, NYS Medicaid Director
Coverage in New York
Statewide Medicaid Enrollment

The NYS Medicaid Enrollment Databook has been recently updated to report monthly statewide enrollment trends: https://health.ny.gov/health_care/medicaid/enrollment/
Enrollment in New York State programs increased by 236,000 between February and May 2020.

- Child Health Plus: Pre-COVID-19: 455,500, Post-COVID-19: 427,000
- Qualified Health Plan: Pre-COVID-19: 268,000, Post-COVID-19: 251,400
Medicaid Response to COVID-19
Regulatory and Program Flexibility During the COVID Pandemic

- Section 1135 Waivers
- Section 1915(c) Appendix K
- Medicaid Disaster State Plan Amendments
- Enhanced FMAP
- CARES Act Provider Relief Fund

Section 1115-a
Modify Service Delivery to Protect Patients and Providers (Examples)

• Suspend Face to Face Requirements for:
  • Initial patient assessment and reassessment for home and community-based services
  • Suspend requirement to sign care plans for community-based long-term services and supports
  • Health Home Care services
  • Permit hospice and home health agencies to perform certifications, initial assessments and determine patients’ homebound status remotely via telephone or through telehealth modalities.

• Allow facilities to bill for services provided in an alternative setting such as a temporary facility.
Ensure Services are Available (Examples)

• Allow billing for telephonic visits for new and established patients
• Expand the types of clinicians, facilities, and services eligible for billing under telehealth rules
• Create an online provider enrollment application to allow practitioners to enroll on a temporary basis, allow out-of-state providers to enroll temporarily and allow applications to be signed electronically rather than through hard copy signature
• Established reimbursement policies for specimen collection by pharmacies
Waive Administrative Requirements to Better Serve Consumers (Examples)

- Automatically extend cases at renewal for 12 months
- Allow attestation at application to reduce administrative burden on consumers
- Suspend certain Utilization Review Requirements for managed care plans
- Suspension of health care surveillance activities or realign to desk review
Section 1115 Waiver
Section 1115 Waiver – What’s Next

• Seeking a one-year extension to the current 1115 waiver, due to expire on March 31, 2021 in order to provide enough time to determine the impact of COVID-19 on the next iteration of system redesign

• Other waiver amendments needed to implement MRT II recommendations will be submitted
Medicaid Redesign Team II
Reconvening the Medicaid Redesign Team

- Convened on February 11 with final recommendations made on March 19th
- Over 2,200 suggestions received through the public portal and through (7) public forums
- Long-Term Care Advisory Group advanced 30 proposals (across 12 topic areas) to the full MRT for consideration

Governor’s Directive that MRT II Recommendations Address:

- the drivers of greater-than-projected costs and growth in the Medicaid program;
- models of healthcare delivery to improve care management for beneficiaries with complex health conditions;
- existing regulations, laws and programs that hinder the modernization or achieving efficiencies in the Medicaid program and for the healthcare industry;
- ways to ensure the availability of a stable and appropriately skilled workforce, especially with respect to meeting the needs of an aging population;
- strengthening the sustainability of safety net providers serving vulnerable populations, including through regulatory reform;
- changes in the Medicaid program to achieve short-term solutions and long-term systemic changes that advance the State’s successful healthcare reform strategy while restoring financial sustainability to ensure that benefits will always be available to those who need it;
- whether any changes to the metric for calculating the Medicaid global cap are necessary;
- the introduction of new data sets, data analytics and technologies to identify current and future trends and improve program oversight, and
- policies to ensure the efficient and effective use of Medicaid dollars and reduce waste, fraud and abuse.
MRT II – The Recommendations

Nearly all final MRT II recommendations advanced in the SFY 2021 Enacted Budget with an estimated $2.2 billion in state share savings

Medicaid Redesign Team (MRT) II

Redesigning THE MEDICAID PROGRAM

MRT II

* Note: the view of this page has changed, please use the navigation bar to the left to access the information previously seen on this page. (7.30.20)

The FY 2021 Budget reconstitutes the MRT, bringing stakeholders who bring experience as health care providers back to the table to find solutions that will once again contain spending growth.

The reconstituted Team will commence its work immediately and hold its first public meeting on Thursday, February 21st. The Team will submit its report with findings and recommendations.

In addition, the MRT II will create an advisory work group to focus on issues associated with long-term care. Enrollment and spending in managed long-term care has accelerated dramatizing the importance of MRT II.

The MRT II will be charged with accelerating the strategies of MRT I that have proved successful for the last nine years while creating course corrections in order to restore financial sustainability.

FY 21. The MRT II recommendations should address:

- the drivers of greater-than-projected costs and growth in the Medicaid program;
- models of healthcare delivery to improve care management for beneficiaries with complex health conditions;
- existing regulations, laws and programs that hinder the modernization or achieving efficiencies in the Medicaid program and for the healthcare industry;
- ways to ensure the availability of a stable and appropriately skilled workforce, especially with respect to meeting the needs of an aging population;
- strengthening the sustainability of safety net providers serving vulnerable populations, including through regulatory relief;
- changes in the Medicaid program to achieve short-term solutions and long-term systemic changes that advance the State’s successful healthcare reform strategy while restoring fiscal solvency;
- whether any changes to the metrics for calculating the Medicaid global cap are necessary;
- the introduction of new data sets, data analytics and technologies to identify current and future trends and improve program oversight, and
- policies to ensure the efficient and effective use of Medicaid dollars and reduce waste, fraud and abuse.
MRT II Policy & Guidance

Policies & Guidance

- **MLTC Policy 20.02**: Moratorium on Managed Long Term Care Partial Capitation Plans
- **MLTC Policy 20.03**: Non-emergency Transportation in the Consumer Directed Personal Assistance Program
Fostering Equity
NY State of Health Enrollment
Self-Reported Race and Ethnicity

Marketplace Enrollees, by Race
- White, Non-Hispanic: 31.2%
- Black/African-American: 13.0%
- Asian/Pacific Islander: 12.6%
- Other: 5.5%
- Did Not Respond: 40.0%

Marketplace Enrollees, by Hispanic Ethnicity
- Hispanic: 25.9%
- Non-Hispanic: 58.7%
- Did Not Respond: 15.4%
Expanding Language Access

Over the last four years, the NYSoH has prioritized language access materials and resources for consumers to ensure that we are meeting the needs for all New Yorkers.

• Marketing Materials: In 2015, NYSoH materials were offered in 7 required languages. Today, these materials are provided in 27 different languages.

• Language Assistance Services: We have attracted consumers who require language assistance through the call center in more languages. In 2015, customer service assisted individual in 92 different languages – growing to 101 different languages in 2019.

• Direct Outreach: The percentage of consumers identifying that they prefer to communicate with us in a language other than English has also increased over time (from 18% in 2015 to 22% in 2019). During this time we have also increased direct marketing and outreach to non-English speaking communities.
Improving Prevention and Management of Chronic Diseases

• Evidence-based strategies and interventions to improve the health of members with chronic diseases including diabetes, hypertension, asthma, smoking cessation, osteoarthritis, chronic kidney disease, HIV/AIDS, and sickle cell disease
  • Expanding access to Self-care and Educational Resources
  • Improving adherence to established evidence-based practice guidelines among the provider community
  • Strengthening chronic condition management within Patient-Centered Medical Homes (PCMHs) and Health Homes
Integrated Care for Kids (InCK)

- Cooperative Agreement from the Center for Medicare and Medicaid Innovation with CMS
- Designed to test an alternative payment model for children
- Provides for a single point of contact for care coordination and care management for moderate- and high-needs Medicaid children and pregnant women in the Bronx
- New York received one of only 8 awards across the nation – $16 million, 7-year model with 2 Phases
  - Phase 1 – Two-year Planning (Pre-implementation) Phase
  - Phase 2 – Five-year Performance Phase
  - Performance-based Measure Milestones in Years 5-7
- Required to work with a Lead Organization, selected as a result of a statewide competitive process
  - Working with Montefiore Medical Center’s Care Management Office led by Dr. Henry Chung
  - Model service area is 8 zip codes in the north-central Bronx
Children’s Preventive Care and Care Transitions

• Promote Behavioral Health Integration in Pediatric care with a 2-Generational Approach to Care
  • Leverage participation and dissemination of CMMI’s Integrated Care for Kids (InCK) model and integration of medical, behavioral, and community-based care and resources.

• Improve Care Transitions for Children
  • Determine opportunities and strategies for improving continuity of care when children transition from Early Intervention to preschool and school-age services, to include communication with Primary Care practices.
  • Identify strategies for effective transition of children with Sickle Cell Disease from pediatric care to adult care settings.
  • Workgroups being convened for each of these.
Promoting Maternal Health

• Optimize the health of individuals of reproductive age through primary care, by encouraging discussions on comprehensive family planning and patient-centered care

• Improve access to quality prenatal care, free from implicit bias

• Ensure postpartum home visits are available to all individuals who agree to have a home visit after giving birth

• Improve access to childbirth education for pregnant individuals

• Support the participation of birthing centers in the Perinatal Quality Collaborative

• Continue the Centering Pregnancy pilot recommended by the First 1,000 Days Advisory Group where 6 obstetrical practices in targeted communities are enhancing pregnancy outcomes through a combination of prenatal education (gestational development, healthy behaviors) and social support
Social Determinants of Health and Global Value Based Payment Pilots

- Medical respite
- Street medicine
- Global value-based payment pilot in the Bronx to bridge hospitals, ambulatory care and community-based organizations
Integrated Care for Dual Eligibles
Improving Care for Persons Eligible for Both Medicare and Medicaid is Health Equity

• The number of persons dually eligible for Medicare and Medicaid continues to grow at a rate higher than the growth in the number of people eligible for Medicare only
• Persons eligible for both Medicare and Medicaid as compared to persons eligible for Medicare only are disproportionately younger and of minority race and ethnicity
• Nationally, in 2018, 47.5 percent of individuals dually eligible for Medicare and Medicaid are of minority race and ethnicity an increase of 6.5 as compared to 2006
• And, more than double the 21 percent of minority race and ethnicity in Medicare only

Vision for Integration

• NYS 2020-21 Budget passed a series of initiatives promoting enrollment of dual-eligible members into Medicare and Medicaid integrated products.

• A multi-part enrollee marketing and education campaign on the benefits of integrated products is in development.
Vision for Integration

• Integrated product campaign goals:
  o Create general awareness about availability and benefits of integrated products.
  o Develop targeted communication for dual-eligible members enrolled in a health plan and about to become Medicare eligible.
  o Phase in enrollees in Medicaid fee-for-service.
NY State of Health
Private Pay Home Care Pilot
NY State of Health Private Pay Home Care Pilot

• Offered through the NY State of Health, consumers would have the option to purchase personal care services from licensed home care services agencies (LHCSA) with private dollars.

• Will permit consumers to search for personal care workers in their area and, based on user-generated criteria including the level of need, language preference, or other criteria, “match” with available workers.

• Once a personal care worker of their choice is selected, the consumer will schedule an in-home or telehealth evaluation with the selected LHCSA.

• More information coming soon.
Individuals & Families
You and your family have many low cost, quality health insurance options available through the Individual Marketplace.

Home Care
Are you in search of a caregiver who is trained and certified to provide direct in-home care services for a friend, family member or loved one?

If so, NY State of Health now provides you with the ability to search, connect and match with a certified in-home care provider in your area.
Consumer Fact Sheets
Communications and Outreach

FREQUENTLY ASKED QUESTIONS about Medicaid Coverage during the COVID-19 State of Emergency for consumers enrolled through their local Departments of Social Services.

1. What benefits are available to Medicaid recipients during the emergency?
   - Food stamps
   - Health care
   - Employment
   - Home care
   - Transportation

2. Can I enroll in Medicaid during the emergency?
   - Yes, you can enroll at any time.
   - Visit the Medicaid website (www.health.ny.gov) for more information.

3. How can I get help if I have questions about my Medicaid benefits?
   - Call the Medicaid hotline (1-800-697-4662) for assistance.

4. What if I have a change in my family situation?
   - Notify the Department of Health immediately.

5. How can I report fraud or abuse?
   - Contact the Department of Health or the Medicaid fraud hotline (1-800-697-4662).

6. Where can I find information about COVID-19?
   - Visit the Department of Health website (www.health.ny.gov) or the Medicaid website (www.health.ny.gov).

7. What is Medicaid?
   - Medicaid is a joint federal and state program that helps people with limited income pay for necessary health care.

8. How do I enroll in Medicaid?
   - Visit the Medicaid website (www.health.ny.gov) for more information.

9. What if I have questions about my Medicaid benefits?
   - Call the Medicaid hotline (1-800-697-4662) for assistance.

10. Where can I find information about COVID-19?
    - Visit the Department of Health website (www.health.ny.gov) or the Medicaid website (www.health.ny.gov).

11. What is Medicaid?
    - Medicaid is a joint federal and state program that helps people with limited income pay for necessary health care.

12. How do I enroll in Medicaid?
    - Visit the Medicaid website (www.health.ny.gov) for more information.

13. What if I have questions about my Medicaid benefits?
    - Call the Medicaid hotline (1-800-697-4662) for assistance.

14. Where can I find information about COVID-19?
    - Visit the Department of Health website (www.health.ny.gov) or the Medicaid website (www.health.ny.gov).

Medicaid is available to individuals and families who meet the income and eligibility requirements.

Patient Factors
- Socio-demographics: age, education, poverty, insurance, marital status, employment, language, literacy, disability
- Knowledge, beliefs, health behaviors
- Psychosocial: stress, weathering, social support

Community/Neighborhood
- Community, social network
- Neighborhood: crime, poverty, built environment, housing

Clinician Factors
- Knowledge, experience, implicit bias, cultural competence, communication

System Factors
- Access to high quality care, transportation, structural racism, policy

Figure 1: Pathways to Racial and Ethnic Disparities in Severe Maternal Morbidity & Mortality

Partnership to Reduce Disparities in High Risk Postpartum Care

• Combined delivery system reform with payment reform to improve quality and reduce disparities in high risk postpartum care
• Funded by RWJF
• Partnered with a Medicaid payer
• Primary aim was to increase rates of timely postpartum visits among high risk obstetrical patients
• Utilized evidence-based intervention
Elements of Delivery and Payment Redesign

**Payment Redesign**
- Cost share to finance social worker & care coordinator
- Small incentives

**Delivery System Redesign**
- Prepares/educates women about GDM, HTN, bolsters support & self management, increases access to community resources
- Occurs during postpartum hospital stay
- Additional contacts (calls, emails, mailings) to connect women with care and resources

**Population:** Postpartum women with gestational diabetes, hypertension, depressive symptoms, late registrant, high-risk neighborhood

**Target for Disparity Reduction:** Postpartum care

Assessments: baseline, 2 weeks, 3 weeks, and 6 months postpartum
Wendy Wilcox, MD, MPH, MBA, FACOG
Chair, OBGYN
NYC H+H/Kings County

Clinical Director,
NYC H+H Maternal Mortality Reduction Project
Maternal Medical Home for patients who are ‘At-risk’ during pregnancy or Postpartum

**Pre-COVID-19**
- Increased screening for clinical, psychosocial and environmental factors which can increase risk during pregnancy
- Improves outreach to patients and facilitates patient engagement
- Improves specialty referrals and care navigation
- Improves support and BH referrals
- Improved referral network to specialty care and community services

**During COVID-19**
- Improved patient outreach
- IMPROVED patient navigation (esp. with televisits)
- Extra layer for postpartum discharges
- COVID+ surveillance and tracking
Aimee Smith, DO
Clinical Director of Maternal Medicine
The Institute for Family Health

IMPLICIT Leadership Council
• **Maternal Health Advocates**
  • Track all pregnant patients and assist them with insurance, community programs and referrals
  • Assist with scheduling prenatal, postpartum, and newborn visits
  • Provide individual counseling and education regarding prenatal health, birth, contraception, and newborn care
  • Co-facilitate Centering Pregnancy and Centering Parenting groups

• **IMPLICIT Interconception Care** – Provide screening for all mothers at well child visits up to 2 years old, whether or not they are our patients, for:
  • Depression
  • Smoking
  • Family planning and birth spacing
  • Multivitamin with folic acid use

PATHWAYS COMMUNITY HUB MODEL

**Background:**
- Method for “community-owned” restructuring of human services to integrate with healthcare within a shared, equity driven framework
- CBOs are convened within a network and coordinated by a central HUB
- HUB facilitates referrals, oversees CHW training, manages quality and negotiates contracts from health payers and other funders
- HUB data informs population health planning for the targeted community

**Model involves:**
- HUB administers outcome-based contracts with multiple payers for the CBO network
- CHWs in each CBO use the Pathways Health Risk Screening Tool to identify the comprehensive array of interrelated risk factors (Pathways) for each member of a family
- Payment is based on the CHW’s performance mitigating the risks (closing the Pathways)
- National certification center ensures fidelity to the model

**In one HUB in Michigan in one year:**
- 2,545 medical referrals
- 97 BH connections to care
- 568 medical home connections
- 224 housing referrals
- Over 8,003 successful connections to address SDOH needs

**Evidence: Quality and Cost Effectiveness**
- 60% reduction in low birth weight
- Cost savings of $5.59 for every $1 spent on the model for high risk maternal population
- 236% ROI found in Ohio HUB

Pathways Community Care Coordination in Low Birth Weight Prevention

Sarah Redding · Elizabeth Coney · Kyle Porter · John Paulson · Karen Hughes · Mark Redding

© The Author(s) 2014. This article is published with open access at Springerlink.com

Abstract The evidence is limited on the effectiveness of home visiting care coordination in addressing poor birth outcomes, including low birth weight (LBW). The Community Health Access Project (CHAP) utilizes community health workers (CHWs) to identify women at risk of having poor birth outcomes, connect them to health and social services, and ensure delivery at a low birth weight.
Medicaid’s Role in Advancing Health Equity

**Health Equity Solutions**

**Vision:**
For every Connecticut resident to attain optimal health regardless of race, ethnicity, or socioeconomic status.

**Mission:**
To promote policies, programs, and practices that result in equitable health care access, delivery, and health outcomes for all people in Connecticut.

Tekisha Dwan Everette, PhD
Executive Director
My Story, My Why
What Is Health Equity…

- Process
- Way of Being/Doing
- Endpoint Goal
SDOH ≠ Health Equity

• Big focus on social determinants/drivers/influencers, BUT
  o health equity ≠ social determinants
  RATHER
  o How do we leverage current programs like Medicaid to advance health equity by addressing SDoH

• To fully achieve health equity, we need to:
  o Name the underlying problem/root cause
  o Examine how inequity is fostered
  o Use data to understand & address the gaps
HELLO THERE!
MY NAME IS

RACISM
A public health crisis/emergency

• Structural
• Institutional
• Interpersonal
• Internalized
## Fostering Inequity & Injustice

<table>

</table>
Why is Medicaid poised to address equity?

• Medicaid is a lever for equity by design
• Provides coverage to significant population
• Building on past initiatives
• Leveraging partnerships
Opportunities for Advancing Health Equity

1. Equity and Inclusion

2. Improving and Streamlining Access

3. Promoting Equity in Outcome
Promoting Inclusion & Embedding an Equity Lens

- Health Disparities Work Group (Medicaid Redesign Team)
  - 2011 Final Recommendations report

**Looking forward:**
- Standing equity group
- Authentic consumer engagement
- Evaluation and accountability
- Feedback loop
Improve & Streamline Access

- Streamline social services applications
- Telehealth access
- Equity audit on Medicaid (e.g. providers accepting new patients or practices limit members access)
Equity in Outcomes

Look at data differently

Devise equity measures & drive toward meeting those outcomes

Primary Care as a Catalyst for Equity

@UnitedHospFund - #UHFMedicaid20

Presented with Support From The Commonwealth Fund
Primary Health Care as a Catalyst for Health Equity

UHF 2020 Medicaid Conference
July 15, 2020

Laurie Zephyrin, M.D., M.B.A., M.P.H.
Vice President, Delivery System Reform
The Commonwealth Fund
Evidence shows that high-quality primary health care is associated with...

- Improved Health Outcomes
- Decreased Health Disparities
- Reduced Health Care Costs

Primary health care with these key attributes can reduce fragmentation
Primary health care can be tailored to meet the needs of specific populations.
Primary health care can be a catalyst to equity in maternal health
Beyond integration, we need to consider the many dimensions of equity-oriented primary health care services.

- Inequity-Responsive Care
- Trauma- and Violence-Informed Care
- Contextually-Tailored Care
- Culturally-Competent Care

Primary health care is still only one piece of the puzzle

- High-Quality, Comprehensive Primary Health Care
- Addressing Systemic Racism
- Health Equity
- Universal Coverage
- Eliminating Health System Bias

Structural Policy Changes
"At MVP, we understand the important role that social factors can have on a person’s overall health and how those influences can effect short and long-term outcomes.

Investing in the underlying social, economic, and environmental factors that contribute to an individual’s health, reinforces our commitment not only to the overall health and wellness of our members, but to the entire community.” -Christopher Del Vecchio, CEO

COVID-19 Member Outreach Campaign

Providing Education; Helping Address Needs

• More than 100 employees trained on Psychological First Aid, then called members to discuss:
  – How are you doing?
  – COVID-19 preventive measures
  – Medication, supply needs
  – Food, transportation, and family support
  – Connect with resources, supply food and care packages

• Calls placed to >70,000 at-risk members in 8 weeks
  – Medicare
  – Medically Fragile
  – Utilizing adult day health, private duty nursing or home care
  – Use of ventilator, tracheostomy, or oxygen
  – Transplant program participants

“This would not have happened without your help. Thank you so much for looking out for me.”

- William, MVP member
COVID-19 Utilization Impact: Telemedicine vs. In-person

Data includes:
- Provider-based telemedicine, telemental health, and telephonic visits
- 24/7 telemedicine services like myVisitNow® and myERnowSM for urgent care services and COVID-19 symptoms

MVP waived member cost-share for all telemedicine visits, including mental health
Primary Care As A Catalyst for Equity

Provider Group Perspective

Navarra Rodriguez, MD
President and Chief Medical Officer
AdvantageCare Physicians
The Formula for Healthier Communities

AdvantageCare Physicians by the Numbers

AdvantageCare Physicians (ACP NY) medical offices provide communities with access to timely primary and specialty care. With a wide range of services that reflect the needs of our diverse patients, including preventive services and chronic care management, ACPNY keeps residents healthy in settings that are convenient and woven into the fabric of each unique community.

Caring for the Whole You.
The hallmark of our approach is personal and neighborhood-based primary and specialty care, including:

- **Continuous care**—the benefit of having a personalized Care Team that follows up with individuals to promote wellness and address acute or chronic needs;
- **Comprehensive care**—access to the Specialty Care Providers and services patients need most;
- **Convenient care**—we’re right in many neighborhoods, easy to get to; and
- **Community**—we can connect patients to valuable local services and resources.

ACPNY’s integrated care teams include primary care physicians, advanced practice clinicians, such as nurse practitioners or physician assistants, registered nurses, and care team associates.
COVID-19’S BIGGEST CHALLENGE TO PRIMARY CARE’S ROLE IN ADVANCING EQUITY: ACCESS TO CARE

Telehealth
- ACPNY quickly implemented virtual visits, providing access to care during the NYS “PAUSE” to support COVID-19 screening, testing, and management of other acute and chronic conditions.

- Leveraging technology made care easier and safer to access for most patients, while we continued to address urgent health needs through in-office care.

- Telehealth improved access and allows us to maintain the health of vulnerable members of the community, but also poses a challenge to health equity.

- Previously, we relied on our presence in the community to engage and provide care to vulnerable community members, ensuring ongoing disease management and addressing social determinants of their health. Telehealth requires us to be more proactive – it is challenging to engage patients who cannot engage virtually, due to incompatible devices or connection issues.

- A recent survey of 1,000 New Yorkers conducted by EmblemHealth and ANA Research found that both low-income and Black/African American New Yorkers are more likely than the general population to have access to only one technology device at home. While the majority of the general population (82%) reported having access to regular and adequate internet at home during COVID-19, almost a quarter of low-income households and nearly a third of Black/African American New Yorkers reported having inadequate internet access.

- We are exploring additional ways to engage with patients at home, through additional digital tools, home monitoring devices, and interventions through our community partners.
Promoting Equity During COVID-19 at a Large Urban FQHC

Sachin Jain, MD MPH
Chief Clinical Transformation Officer
Community Healthcare Network

UHF Medicaid Conference
July 15, 2020
Community Healthcare Network

- FQHC with 12 primary care clinics, 2 school-based health centers, and mobile units covering Brooklyn, Queens, Manhattan and Bronx

- Serve nearly 80,000 patients annually

- Provide primary medical care, HIV treatment, PEP, PrEP, transgender care, social work, health education, family planning, psychotherapy, nutrition, dentistry, podiatry, psychiatry, care coordination, medico-legal partnerships
### Innovation: Community Partnerships & COVID-19

### Opportunity: Reimbursement

#### Care Provision
- Telemedicine when clinician is offsite
- Technology for patients/staff
- E-consults
- Home visits

#### Care Management
- Secure bi-directional messaging
- Remote patient monitoring
- Data/Analytics to identify and engage unseen patients
- Home-based COVID testing
CHCS’ Work Supporting Primary Care

- CHCS provides technical support to state Medicaid agencies, health plans, and providers to improve care delivered to low income individuals.

- Select CHCS primary care and equity initiatives:
  - Advancing Primary Care Innovation in Medicaid Managed Care
  - Advancing Health Equity Initiative

- Promising policies—payment reform:
  - Prospective payment models to primary care practices serving diverse populations
  - Reward all staff for reductions in health disparities
State and Plan Levers to Improve Health Equity

- Michigan’s Capitation Withhold for Health Plans
  » Health equity component: rewards plans with equitable care in four metrics
  » Health improvement component: rewards plans that have improved performance in five metrics

- Community Health Care Network’s VBP arrangement
  » Provider organization receives monthly capitated payment
  » Team members receive monthly incentives of up to 3% salary for performance in metrics and processes of care for conditions that have disparities
  » Teams receive mid-month metric reports
Fee for Service Payments:

- COVID-19 has underscored the financial instability of FFS payment models, especially for safety net practices.
- This includes more advanced value-based payment models like shared savings and shared risk that rely on FFS.
